The ‘יז’ and ‘צא’ in the University emblems are derived from the first letters of ‘Yonsei’ in Korean. The circle represents the ideal of a complete and well-rounded person, while the upward sign symbolizes the pursuit for scholarly excellence. They also stand for Heaven and Human, respectively, in the Oriental philosophy.

YONSEI, AT THE FOREFRONT OF GLOBALIZATION
As the first and best university in Korea, Yonsei University aims to foster students’ potentials and motivate them into leaders who serve the common goals of humanity in accordance with the spirits of truth and freedom. Founded on the lessons of Christianity, Yonsei has undergone the hard times of modern society in Korea and has extended Korea’s educational frontier.

THE TRUTH WILL SET YOU FREE (JOHN 8:31~32)
Yonseians inherit the cultural heritage of both Korea and the world, nurture creativity and critical thinking, and achieve academic development. Yonseians are aware of their responsibility to enhance vitality, promote justice, serve neighbors, and contribute regionally and globally. Yonseians realize the proud spirits of Yonsei by demonstrating their leadership in the world.
Year 1885, Yonsei’s First Step towards the World

Yonsei’s 126th Anniversary: The History of University in Korea

The history of Yonsei University dates back 126 years ago when the first medical missionary, Dr. Horace N. Allen founded Kwanghyewon, the first modern hospital in Korea and the former hospital of Yonsei’s medical college. Kwanghyewon was shortly transformed to Jejungwon, where medical missionaries, Dr. Horace G. Underwood and Dr. Henry G. Appenzell taught Korean students western medicine. In 1900, Severance Hospital was established from Jejungwon across Seoul Station with the donations from Mr. Severance; and in 1908, the hospital issued the first medical doctor licenses in Korea.

In 1915, on the other hand, as if transforming sterile into fertile land, Dr. Underwood established the first Christian institute of higher education in Korea—the Chosun Christian college. He accomplished erecting the university despite the oppression from the Japanese invaders. When it was first established, Chosun Christian College was composed of the Department of Liberal Arts, Mathematics & Physics, Business Management, Agriculture, and Theology. Two years later in 1917, the college was converted into Yonhee College, the first private professional college in Korea. Yonhee College maintained the deep tradition of Korean studies and initiated modern studies in Korea.

In 1957, Yonhee College and Severance Hospital were integrated into Yonsei University.

As in the Past 126 Years, Yonsei Leaps in the Coming 126 Years - In a Larger World, To a Brighter Future

Yonsei University has been ahead in “Korea’s legend of the best”, constantly setting “the first” records in Korean university education. These records include the first Institute of Eastern Studies, the Yonsei Korean Language Institute, the first residential campus. Others such as the Yonsei Korean Monument, the Centennial Memorial Hall, the new Severance Hospital, and the Yonsei-Samsung Library, to name a few, mark Yonsei the most distinguished university in Korea.

In 2005, the Yonsei Vision 2020 was formulated in celebration of Yonsei’s 120th anniversary. In 2010, the ‘Worship and Gratitude Festival’ took place with around ten thousand alumni and christians on Seoul Campus. Yonsei University is the “premium brand” in higher education and academic research, and “pride” of Korea.
Three Campuses of Yonsei University

Yonsei University provides the best of education facilities for students and possesses the vast and the most beautiful campuses in Korea. The three campuses of Yonsei University are Seoul, International, and Wonju.

SEOUL CAMPUS - Hall of Academic Research
Currently in 2011, the three campuses of Yonsei University—Seoul, International, and Wonju—retain 22 colleges and 94 departments in which around 38,000 undergraduates and graduates explore academic interests and professional goals. The Yonsei University Graduate School comprises 21 graduate schools, including the specialized and professional schools, and 240 graduate programs. Yonsei offers around 6,300 undergraduate and graduate classes.

Yonsei University operates approximately 146 research institutes and consists of 4,300 faculty members. Over 250,000 Yonsei alumni have advanced into various fields, constantly realizing ‘Yonsei Pride’ in both the Korean and global society.

Along with the long history, the Seoul Campus retains the most beautiful university campus in Seoul. The Seoul Campus is not only Korea’s representative research-based university, but also provides a state-of-the-art learning environment. For example, the Yonsei-Samsung library is equipped with the latest multimedia technologies—no less competent than any worldwide university.

INTERNATIONAL CAMPUS - Hub of Global Knowledge
Established in 2010, the International Campus aims to fulfill ‘Inbound Internationalization’ in cooperation with the Seoul Campus. In the spring cycle for 2011, the International Campus recruits its first group of students for the College of Pharmaceutical Sciences and the School of Integrated Technology at College of Engineering. As Korea’s MIT media lab, the School of Integrated Technology at College of Engineering plans to create Da Vinci-esque students and researchers in Korea. This new school will impose project-based curricula, including TIF (Technology + Imagination + Future) projects.

Over 400 students of the intended 2011 freshmen from the Colleges of Dentistry and Medicine, the Underwood International College, and from the Free Major will attend English immersion programs and live in on-campus dormitories. For international students, the Pre-university courses have been initiated for learning the Korean language. In 2012, the campus will inaugurate undergraduate premium programs, such as the College of Asian Studies, which will operate in partnership with leading universities in China and Japan.

WONJU CAMPUS - Environment-Friendly Center for Integrated Studies of Medicine and Engineering
The Wonju Campus functions as the Mecca of the integrated studies of medical and engineering sciences for the ‘Yonsei Vision 2020’, which incorporates research specialization projects aimed for the 10-5-20 plan (within 10 years, 5 research fields, into the world’s top 20 rankings). The Campus not only houses a poverty research institute, but also an institute that produces future leaders in developing countries around the world.

Yonsei International Campus : locational Advantage

Joint Program with CalArts at International Campus

The International Campus of Yonsei University will establish the ‘Yonsei-CalArts School of Arts’ (tentative name) and launch a joint degree program with the California Institute of the Arts (CalArts), an internationally renowned art school. The joint degree program intends to focus on developing professional artists versed in both technical skills and cultural sensitivity. The program will create new joint curricula, and eminent faculty from CalArts will teach courses at the International Campus. The California Institute of the Arts was founded in 1961 by Walt Disney Productions, which was based on the Los Angeles Conservatory of Music and the Chouinard Art Institute.
In the center of a world of integration and digital ubiquity stands the Yonsei-Samsung Library. Furnished with state-of-the-art facilities, the library enables students and scholars to explore the vast amount of knowledge that is expanding at an ever-increasing rate and to communicate beyond the barriers of time and space.

The Yonsei-Samsung Library is widely recognized for the latest library facilities where the most advanced technology for information exchange and ubiquity is fully applied. Whichever they have access to the Internet, students can identify where seats are vacant and make reservations for study space. Large LCD screens not only display notes and notices uploaded by the students, but also provide access to information about library resources. The research materials in all three campuses are organized according to an easy-to-navigate database. The library has emerged as a must-visit location for visitors from schools and corporations—both domestic and international.

Yonsei University Library, Ubiquitous Information Hub for All Yonseians

Yonsei University has been ranked first place in the 2010 overall assessment of Korean university libraries conducted by the Ministry of Education, Science and Technology, and Korea Education and Research Information Service. A total of 58 university libraries were assessed in terms of three categories: ‘specialization in education & research support service,’ ‘contents enlargement and reinforcement of information knowledge,’ and ‘connection with local community and expansion of external cooperation.’

Yonsei University especially scored high points for constructing an information technology-based research environment and assigning specialized reference librarians. As the winner in the overall assessment, Yonsei was granted the first prize of 70 million won.
The Yonsei University Health System (YUHS) includes a number of colleges, hospitals, and research centers on the three campuses. As one of the most renowned hospitals in Korea, located in the Seoul Campus, Severance Hospital (formerly Kwanghyewon and Jejungwon) was the first modern hospital in Korea. Based on the mission ‘With the love of God, Free Humankind from Disease and Suffering’, YUHS serves as a major medical treatment and research center for the global community.

Both Severance Hospital and Gangnam Severance Hospital have been accredited by the Joint Commission International (JCI) in 2007 and 2010, respectively. In 2010, Severance Hospital received a second JCI accreditation, illustrating the high standards of medical care. It also successfully obtained accreditation in the Stroke Program, one of the new JCI clinical care program certifications. YUHS global recognition is evident by requests for hospital management from cities such as Yi Shing, Cairo, Port Moresby, and Los Angeles. Patients from Middle Eastern countries also visit Severance Hospital to take physical examinations. In three and a half years since the Da Vinci robot surgery was first performed at Severance in 2005, the number of robotic surgical operations has reached 5,000 in 2010. All these indicate Severance’s development as a globally accredited and acclaimed medical center.

This year, the renovation and new construction of the Ludlow Research Center, Rehabilitation Hospital, and Cardioangiology Hospital will be completed; while the Avison Biomedical Research Center and Cancer Specialist Hospital have started to be constructed. Investments for future growth such as the Yongin Dongbaek Severance Hospital, Incheon International Severance Hospital, and Pre-Clinical Research Center will continue in the following years, as well.
YONSEI KOREAN LANGUAGE INSTITUTE

Korean Language Writing Contest for 20 Years & New 25-Volume Series of Korean Language Textbooks

Established in 1959 as the first Korean language institute in the world, the Yonsei Korean Language Institute (Yonsei KLI) in the Institute of Language Research and Education, has provided education in Korean language and culture for more than 70,000 foreigners from around 130 countries around the world. Around 6,600 foreign students from 75 countries study annually at Yonsei KLI. A few of the many who studied at Yonsei KLI include Kim Yong, President of Dartmouth University; Yang Woo-young, Professor of Engineering and Applied Sciences at Harvard University; Jane Portal, curator of the Korean collections at the British Museum; Yoshimura Yasuo, Japanese consul in Korea; Ryeji Ito, Seoul Bureau Chief of NHK (Japan Broadcasting Corporation); and Kevin O’Rourke, Professor at Kyung Hee University.

Yonsei KLI has held the Korean Language Writing Contest for almost 20 years. This contest, which takes place not only in Korea but also abroad in about 10 countries, stimulates interest in the Korean language and enhances national prestige.

In 2010, Yonsei KLI completed the new series of Korean language textbooks, *Yonsei Korean*. This new series, composed of 25 volumes—13 main textbooks, 6 practice workbooks, and 6 reading books, is an expanded version of the first Korean language textbook An Intensive Course in Korean which was published in 1960 by Professor Park Chang-hwa. At a time when the Korean was not systematically taught as a foreign language, Yonsei KLI’s publication was a pioneering achievement.

As it has always done in its history of 51 years, Yonsei KLI carries on developing the most distinguished Korean language education program. Yonsei KLI broadens the understanding of Korean society and people by teaching the Korean language for international students; fosters the spirit of appreciation and respect among different cultures through the exchange of language and culture; and carries out Yonsei University’s educational statement by making contributions to the development of the global society and mankind.

Creating New Global History in Korea

Exchange Students to 617 universities in 59 countries

The future is bright to those who confront different challenges; and such challenges are found at Yonsei University. Education and research at Yonsei is a promising step forward.

As the first in Korea to engage in international activities with universities worldwide, Yonsei University has made remarkable progress in growth as a leading global university. In the era of limitless competition, Yonsei makes constant effort towards becoming one of the world’s best universities.

Yonsei University nurtures global leaders through various international exchange programs.

Over 1,000 students (as of February 2011) are engaged in the study abroad programs operating with 617 universities in 59 countries. These students are being educated as ‘special leaders’ who will be particularly responsible for Northeast Asian issues. Yonsei has been also making successful attempts to achieve ‘Inbound Internationalization.’ Yonsei International Summer School in search for excellence and diversity in education and research. Around 77,000 students from 132 countries (as of March 2010) learn Korean language and culture at the Yonsei KLI.

Also, approximately 2,500 international students are enrolled in the undergraduate and graduate programs of Yonsei University, especially in the Underwood International College (UIC), the Global MBA Program, and the Graduate School of International Studies (GSIS). Most of the international students can apply for, study at, graduate from Yonsei with no problems since some of the international classes are offered in English. In fact, the courses offered by international programs throughout campuses are in English, while 28.54% (as of Oct 2010) of all the courses offered in Yonsei are delivered in the English language.

International students who study at Yonsei receive support and assistance from the Office of International Affairs (OIA) till the graduation. A selected number of incoming exchange students in undergraduate programs can take courses delivered in English at the GSIS and UIC as well.

The Underwood International College (UIC) is a highly selective four-year liberal arts college, which serves as an intimate, elite setting within the larger institution of Yonsei. All instruction is conducted in English to facilitate multi-cultural and multinational perspectives on campus.

By bringing together visiting and permanent faculty from Ivy League-level universities from around the world, and drawing upon top faculty talent from within Yonsei, UIC will educate creative, critical, and independent thinkers who will take their place on an international stage.

UIC also aims to generate a vibrant, truly multinational, yet uniquely East Asian community for our students. Within its broadly based liberal arts education, UIC also draws upon the rich and distinguished tradition of Korean studies at Yonsei.

As Korea’s first professional school dedicated exclusively to global affairs, Yonsei University’s Graduate School of International Studies (GSIS) has one overriding mission: to enable our graduates to become members of a ‘Global Corps.’ For those who are imbued with international genes but who also want to experience Asia, Yonsei GSIS offers the best of both worlds: immersing yourself in an outstanding interdisciplinary program with hands-on exposure to Asia’s unfolding opportunities and challenges.

As a member of the Association of Professional Schools of International Affairs (APSIA), the GSIS also draws upon a network of top schools worldwide.

Yonsei and Harvard Co-Host the ‘HPAIR 2011 Asia Conference’

Yonsei has been appointed to co-host the ‘HPAIR 2011 Asia Conference.’ For four nights and five days, 500 participants and 120 guest speakers will attend the 2011 Conference at Yonsei University and the Coex Convention and Exhibition Center in Korea. The author of Justice: What's the right thing to do and professor at Harvard University, Michael Sandel is going to be one of the special speakers.

The HPAIR Asia Conference is jointly organized by the Harvard Project for Asian and International Relations (HPAIR) and student-run organizations in Asian countries. As one of the largest international university student conferences, the first conference was held in Taiwan in 1992. For its 20th anniversary, the HPAIR 2011 Asia Conference will address significant issues on the politics, economics, society, and culture in the Asian-Pacific region with worldwide scholars and CEOs from various fields, over 100 renowned speakers, and 400 undergraduate and graduate students from universities worldwide.

Yonsei’s MBA in the 2010 Financial Times’ Top 100 EMBA Ranking

The Corporate MBA program in the Graduate School of Business at Yonsei University was listed in the 2010 Financial Times’ global ranking of Executive MBA (EMBA) programs, which is one of the world’s most influential rankings along with that from the Business Week.

In the ranking, the Corporate MBA of Yonsei came in 71st place, and it is the first MBA program in Korea to be ranked in Financial Times’ top 100 EMBA ranking.

Yonsei-Keio-Rikkyo-Fudan Leadership Forum

The student delegation of the Yonsei-Keio-Rikkyo-Fudan (YKRF) Leadership Forum took part in the 2010 YKRF Leadership Forum in Keio University. The participating students from Korea, China, and Japan engaged in various cultural exchange activities and participated in presentations and discussions on ‘Asians as Global Leaders—Cooperating in the Region, Changing the World.’ Held every year in one of the three countries on a rotation basis, the YKRF Leadership Forum conducts extensive discussion on political, economic, and cultural issues in the Northeast Asian countries. The proposal for the Forum was initiated in 2002 by the MOU agreement among Yonsei, Keio, and Rikkyo University in Japan. China’s Fudan University joined in 2006, which then developed the proposal into today’s YKRF Leadership Forum.

Dear Friends of Yonsei University

As the country’s first modern university, Yonsei University is celebrating its 126th anniversary this year. Yonsei University was founded upon the Christian principles of truth and freedom. These principles are at the foundation of Yonsei education that cultivates leaders of our society. The long tradition of Yonsei University can be accredited to missionaries such as H.N. Allen, H.G. Underwood, and O. R. Avison who, when ‘called upon,’ came to our country and demonstrated great passion and dedication.

Yonsei University has undergone remarkable development and has grown into the nation’s top private university. Having stood alongside the joys and sorrows of Korea’s modern history, the university is now celebrated as the center of cutting-edge education and research, and also as the starting point of Korea’s medical education and medical missions. As a pioneer of academic instruction and research, Yonsei has greatly contributed to the independence, modernization, and the development of the nation.

The name ‘Yonsei’ is derived from the first syllables of Yonhee and Severance, which come together to mean: “to lead the world.” From the beginning, the founders of Yonsei had a global vision in mind. And to continue with this long-held legacy, in March 2010, Yonsei opened the International Campus in Incheon through which the university is now making another giant leap as a true global institution.

In 2010, Yonsei University proudly ranked 142nd in QS World University Rankings. In the Chosun Ilbo-QS Asian University Rankings, Yonsei was the only in Korea to be ranked within the top 20. Such an ascending path has been constructed by endless effort from many, especially the researchers and professors at Yonsei. Yonsei University will continue to strive forward to establish itself as one of the world’s leading universities.

Han-joong Kim M.D., Ph.D.
President, Yonsei University, Seoul, Korea
No regrets, if we did our best.
All together, if we do our best.
