YONSEI’S MISSION

The oldest university in Korea, Yonsei was established in 1885 by Christian missionaries. Our mission is to educate future leaders who will contribute to humanity in the spirit of truth and freedom. Yonsei graduates typify this proud spirit in leadership positions throughout the world.
YONSEI, where we make history

Establish an Educational Institution of Global Stature
Open world-class residential campus
Asia’s World University

Enable Autonomy and Convergence through Multi-Campus Structure
Create synergy between campuses
Nurture unique strengths of each campus

Yonsei’s “Third Founding”
Excellence cum Dignitate

Reinforce World-Class Research
Foster world-class research
Expand interdisciplinary research and collaboration with industry

Advance Campus Infrastructure
Ensure a sound financial base
Renovate campus environment

Spred Community Culture
Demonstrate service leadership
Establish an open community culture

Freedom
Fostering Intellectual Freedom and Curiosity

“The truth will set you free”
(John 8:32)

Founded on the Christian values of truth and freedom, Yonsei University recognizes that free intellectual inquiry is the essence of higher education. We believe that the pursuit of knowledge and intellectual freedom are not only the hallmarks of a thriving educational environment, but also a strong and just society. Remaining faithful to these principles, Yonsei has led the way in modernizing Korean higher education, raising its standards to match those of the great universities across the globe.
A Yonsei Individual, A Global Citizen

With no limits to their exploration, Yonseians relentlessly strive to meet global standards of excellence.
Exploring Yonsei’s Campuses

Yonsei is the only university in Korea with 4 campuses. These are the flagship campus in Sinchon, the Yonsei University Health System (Severance Hospital) also in Sinchon, the Wonju campus, and the Yonsei International Campus in Songdo, Incheon. Yonsei's educational and research capacity has been doubled by its integration of all 4 autonomous campuses into a single network.

 points of pride

1. **Yun Dong Ju Monument**
   - This monument was established in honor of the life and works of poet Yun Dong Ju, a graduate of Yonhee College (now Yonsei University), who died in a Fukuoka, Japan prison in February 1945 at the age of 29. The Yun Dong Ju Monument Construction Committee was formed in 1967, and with the heartfelt contributions of Yonsei students and alumni, the tombstone engraved with Yun's poem "Prologue" was unveiled in 1968 in front of Pinson Hall, the dormitory where he lived as a Yonhee student. Every year, the Yonsei University Yun Dong Ju Memorial Society awards the Yun Dong Ju Poetry Prize and holds a Poetry Recitation Contest to commemorate the poet's literary legacy and his love for his country.

2. **Amphitheater**
   - The semicircle-shaped Amphitheater was the first of its kind in Korea, and it is a source of pride for all Yonseians. Completed in May 1933, faculty, staff, and students all participated in the construction process, which was led by Professor Miller (Chemistry). Following repair work in 1957, and an alumni-funded renovation in May 1999, the Amphitheater assumed its present form. A plaque on its stairway reads in English: "In感激 by the names of the Yonsei alumni who generously contributed to the renovation of the Amphitheater." Converted from a dormitory, the Amphitheater can hold around 8,000 spectators.

3. **Cheongsongdae (Listening to the Sounds of Pine Trees)**
   - Cheongsongdae is a quiet, forested park on Yonsei's Sinchon campus. Cheongsongdae’s beauty was praised by the essayist Lee Yang Ha in "Shinrokyechan" (Admiration for the Verdure), and in 2010, it was incorporated into the Yonsei Olle (walking trail). The harmonious beauty of Cheongsongdae is cherished by Yonsei students who seek the serenity of its tall, green pine trees to relax and dream in their shade.

4. **Gwanghyewon / The Garden of Yonsei History**
   - As part of the Yonsei Centennial Project, restoration of the Gwanghyewon Building (Widespread Relief House) began in May 1986. Situated next to the Sukyeongwon Tomb, it was unveiled at a ceremony in 1987. As the first modern Royal Hospital in Korea, and the precursor of today’s Yonsei University Health System, Gwanghyewon first opened in 1885 as a general hospital, with 40 sickbeds, an operating room, pharmacy, and facility for outpatient examinations. Today it is the site of the “Yonsei Archives,” where visitors can view artifacts from the early years of Yonsei University.

5. **YONSEI UNIVERSITY HEALTH SYSTEM (Severance Hospital)**
   - Flagship of Academics and Research

6. **INTERNATIONAL CAMPUS**
   - Cultivation of Global Leaders

7. **YONSEI UNIVERSITY HEALTH SYSTEM (Severance Hospital)**
   - The Cutting Edge of Medical Training and Research

8. **CHEONGSONDAE PARK**
   - A former public park (today the scenic site), Cheongson Park is a quiet, forested path on Yonsei’s Sinchon campus. Cheongson Park is a popular spot for the students to relax and dream in the shade of its tall, green pine trees. The harmonious beauty of Cheongson Park is celebrated by Yonsei students who seek the serenity of its tall, green pine trees to relax and dream in their shade.
Yonsei Innovators

Yonsei is committed to fostering interdisciplinary research within its colleges, institutes, libraries, and research centers. From the humanities to the natural sciences, Yonsei’s diverse research community continues to generate innovative ideas that have a global impact.

**Professor CHEON, JIN-WOO**
(Chemistry)
Professor Cheon is a globally recognized scholar in the field of nano-technology. His work established the “law of nanosciences” and pioneered interdisciplinary integration of substance structure. His research community continues to generate innovative ideas that have a global impact.

**Professor HAM, SEUNG-JOO**
(Chemical and Biomolecular Engineering)
Professor Ham developed new diagnoses and treatments for diseases such as cancer by introducing interdisciplinary research integrating nano-engineering, biomedical engineering, and radiology.

**Professor KIM, PAN-SUK**
(Public Administration)
Professor Kim was awarded the Paul P. Van Riper Award for Excellence in 2012. His work in the practice and study of public administration is recognized.

**Professor CHANG, YONG-SUNG**
(Economics)
Since 2000, Professor Chang has published 30 papers in Social Sciences Citation Index (SSCI) journals, 3 of which appeared in the prestigious American Economic Review. His article “Labor-Market Heterogeneity, Aggregation, and the Policy-Invariance of DSGE Model Parameters” was recognized in 2013.

**Professor LEE, MIN-GOO**
(Pharmacology)
Professor Lee has developed new diagnoses and treatments for diseases such as cancer by introducing interdisciplinary research integrating nano-engineering, biomedical engineering, and radiology.

**Professor PAIK, YOUNG-KI**
(Astronomy)
Professor Paik discovered the phenomenon of “glow” and has received around 8,500 scholarly citations. His groundbreaking research into galaxy formation and stellar evolution has distinguished him as the leading astronomer in Korea. He has published some 230 papers, 5 of which appeared in Nature or Science, and his work has received around 6,500 scholarly citations.

**Professor KIM, DOUG-HO**
(Chemistry)
Professor Kim’s research, using a cutting-edge time-of-flight mass spectrometer connected to a spectroscopic system in plates, which restrict the protein turnover process at the molecular level and increase drought tolerance.

**Professor LEE, YOUNG-WOOK**
(Biochemistry)
Professor Lee investigated genetic variations of drug transporter protein cell membranes and developed a related treatment for cystic fibrosis.

**Professor PAIK, YOUNG-KI**
(Life Sciences and Biochemistry)
Professor Paik discovered the phenomenon of “glow” and has received around 8,500 scholarly citations. His groundbreaking research into galaxy formation and stellar evolution has distinguished him as the leading astronomer in Korea. He has published some 230 papers, 5 of which appeared in Nature or Science, and his work has received around 6,500 scholarly citations.

**Professor KIM, JIN-WOO**
(Chemistry)
Professor Cheon is a globally recognized scholar in the field of nano-technology. His work established the “law of nanosciences” and pioneered interdisciplinary integration of substance structure. His research community continues to generate innovative ideas that have a global impact.
The RC is a globally-focused learning program that fosters creativity and service leadership. To facilitate the program's growth, the Residence Hall in Songdo is being transformed from a simple dormitory to a lively learning space in which academics and community life are integrated. The RC program will be open to freshmen at the International Campus beginning in March 2013.

The RC is a holistic educational system based in a learning community, whose goal is to create intelligent global citizens who are both cultivated and ethical. To this end, students take part in a variety of cultural, religious, and community service activities according to their individual skills and interests. Participating in such activities enables students to enhance their aesthetic sensibility and expand their understanding of what it means to be a citizen in a globalized world.

Living together on campus, RC students have more opportunities to form meaningful and long-lasting networks; at the same time, student club activities are especially dynamic and robust. In this diverse, multicultural environment, students are trained to become global leaders who appreciate cultural differences and realize the importance of communication and collaboration.

Based on the model provided by America’s Ivy League universities, Yonsei’s RC system marks a significant advance in Korean higher education. It will enable Yonsei to more effectively facilitate the formation of global citizens who can think critically, creatively, and compassionately about the complex issues confronting our world in the twenty-first century.

With its 4 campuses, Yonsei offers a range of programs unparalleled in Korea. Because of this diversity, students have complete freedom to discover and cultivate their intellectual passions. All of Yonsei’s academic programs are distinguished by their emphasis upon creative thinking and innovative research.

Through its integrated educational curriculum, which now includes the Residential College (RC) program, Yonsei shapes intellectually curious, well-rounded individuals who will be competitive in the global marketplace. Yonsei’s Underwood International College (UIC), Global MBA Program, Graduate School of International Studies (GSIS), and Korean Language Institute (KLI) epitomize the commitment to providing a dynamic and truly international educational environment.
Creating Leaders and Responsible Global Citizens

GSIS
The Graduate School of International Studies

GSIS was founded in 1983 as the first professional school in Korea dedicated solely to international studies. All of the courses are taught in English, and its mission is to train graduate students to become international experts attuned to the complex interchanges between the political, economic, and cultural spheres. For more than 25 years, Yonsei’s GSIS has been at the forefront of Korea’s rapid process of globalization, educating and mentoring international leaders for the twenty-first century.

Korean Studies Program (KSP)
Program in International Cooperation (PIC)
International Trade Finance & Management Program (FTFM)

UIC
Underwood International College

Yonsei University established Underwood International College in 2005 as a highly-selective, English-language college combining the intimacy and rigor of a liberal arts program with the resources of a major research university. Providing an Ivy League-caliber education to an elite academic community, UIC has students from over 40 countries who are guided by full-time international faculty trained at some of the world’s most prestigious academic institutions. With class sizes limited to 20-30 students, UIC’s professors provide individualized attention to students, ensuring a supportive, demanding, and stimulating academic environment. UIC’s students are prepared to meet the complex challenges facing the twenty-first century through its humanistic-based, interdisciplinary Common Curriculum and its nine majors in three academic divisions.

UIC graduates currently work at top global corporations, such as McKinsey, Goldman Sachs, Samsung, and Hyundai, and attend leading universities, such as Harvard, Yale, Oxford, and other elite institutions.

Underwood Division: Comparative Literature and Culture, Economics, International Studies, Political Science and International Relations, Life Science and Biotechnology
Asian Studies Division: Asian Studies
Techno-Art Division: Information & Interaction, Creative Technology Management, Culture & Design Management

GMBA
The Global MBA

The Global MBA (GMBA) aims to produce creative global leaders equipped with expert knowledge of management theories and a variety of business practices. In addition to the innovative curriculum, with its emphasis upon collaborative projects, the GMBA provides a truly global experience, with 50% of its students coming from abroad and representing nearly 30 countries. Korean students in the program are highly encouraged to take advantage of exchange programs in the United States, Europe, or Asia depending on their professional interests.

For the second consecutive year, Yonsei’s Global MBA program was the only MBA program in Korea to be included in The Economist’s list of the top 100 full-time MBA programs. For 2012, Yonsei’s GMBA program was ranked 87th in the world, and 6th in Asia. In its detailed rankings, The Economist rated Yonsei’s GMBA program 14th in “Education experience,” 14th in “Breadth of alumni network,” and 22nd in “Number of jobs three months after graduation.”

KLI
Korean Language Institute

Established in 1959, Yonsei’s KLI was the first educational institute to offer comprehensive courses in Korean language and culture to foreigners. From its modest beginnings with a group of 24 students, the KLI now teaches more than 40,000 graduates from nearly 140 countries, including several notable diplomats, academics, and journalists. Every year, 6,000 students from 75 countries take Korean language courses at the KLI.

For the past 30 years, the KLI has hosted its annual Hangul Writing Contest, the aim of which is to spotlight the richness and beauty of the Korean Language to the world. As the “cradle of Korean language education for foreigners,” the KLI published in 2010 Yonsei Korean Language, a new series of 25 language instruction textbooks. The publication was a continuation of the work of the late Professor Park Chang-hae, whose An Intensive Course in Korean was the first systematic Korean language textbook for foreigners, revolutionizing the field of Korean language instruction.
Limitless Possibilities

Library

The Yonsei University Library, with its highly accessible resources and user-friendly system, serves to inspire ideas and provide the tools necessary to produce world class research.

The Yonsei University Library began in 1915 with the establishment of Yonhee College; at that time, it was called the "Central Library," and was located at the YMCA in Jongno. In 1990, the Yonsei University Library became the first library in Korea to adopt an entirely digital reference system, and in 1999, it developed a web-based archiving system. In 2001, it launched an integrated digital library system, allowing users to more easily access bibliographical information, locate original sources and multimedia materials, and to find information on research and lectures. The Yonsei Samsung library was completed in 2006, and is connected to the Main Library, which underwent its own renovation in 2011. Thanks to these projects, the Yonsei Central Library complex provides an ultra-modern and pleasant research environment, with the latest in information technology, and comfortable study spaces. Combined, the Main Library and the Yonsei Samsung Library cover 53,000㎡ of floor space, making it the largest and most modern library in Korea. The Yonsei University Library holds more than 1.9 million books and 16,000 periodicals in print. Its database of electronic materials provides access to more than 93,000 e-books and 58,000 online journals.

Housing Information

Muak Dormitory

Muak Dormitory consists of 4 double buildings accommodating approximately 2,000 people in double rooms. Located near Yonsei's North Gate, Dorms 1 and 2 house about 1,000 undergraduate and graduate students. Dorm 4B is reserved for international faculty and instructors.

International House & SK Global House

Yonsei University’s International House, or Kukje Haksa, which includes the SK Global House, is a modern, high-tech facility. Both Korean and non-Korean students live here, creating an international atmosphere where the primary language is English.

International Campus Residence Hall

The Residence Hall at the International Campus in Songdo, Incheon consists of 3 buildings with the capacity for 2,000 students. Completed in 2010, this housing complex is equipped with modern, high-tech facilities. For first year students living here, the Residential College system provides social activities and community-based learning courses. The Residence Hall is mainly comprised of triple rooms.
Since its opening on the Sinchon Campus in November 2002, the Global Lounge has played a central role in promoting on-campus cultural diversity, serving as a meeting place for those interested in taking an active part in the life of Yonsei’s international community. Supporting a large exchange network, the Global Lounge is an important hub for domestic and international students and faculty to strengthen relationships and widen their perspectives.

The main facility caters to about 150 people, and it contains 7 television screens broadcasting 14 different international channels. Visitors can check out wireless headsets, which allow them to follow news events from around the world, and they can participate in a variety of language exchanges. Many additional services and activities promoting cultural diversity at Yonsei are also offered by the Global Lounge.

Yonsei Global is a student organization whose goal is to expose Yonseians to a variety of world views by facilitating opportunities to experience diverse cultures. Yonsei Global’s events and programs allow Yonseians to meet exchange students, as well as other students with international backgrounds.

The Mentors Club facilitates one-on-one interactions between international and domestic Yonsei students. Through its “Buddy Program,” international students, based on their interests, hobbies, and goals, are matched with a Korean Yonsei student. The Mentors Club strives to promote the ideals of community, friendship, and cultural learning through shared experiences.

The International Yonsei Club (IYC) is composed of Yonsei students who are interested in building stronger ties between Korea and the rest of the world. IYC, which arranges regular activities, forums, language exchanges, and retreats, provides many excellent opportunities to make new friends from throughout the world.

There are various other scholarship programs that are not offered on a regular basis, but which may be available during any given semester or academic year. When such an opportunity arises, the UIC Office will make an announcement to all eligible UIC students.
The Dream Start mentoring program began in 2009. In this service program, Yonsei undergraduates become mentors for underprivileged high school students in the Seodaemun-gu area. Through one-on-one mentoring, Yonsei students get the opportunity to contribute to the local community by sharing their knowledge and experience with their mentees, assisting them in activities ranging from school work to character building. The program is intended not only to improve the academic performance and self-confidence of the high school students, but also to instill a greater sense of social responsibility in their Yonsei mentors.

**Saeum**

“Saeum” is a volunteer group that works to create “happy-tats” (happy habitats) for economically disadvantaged local residents. This program provides the underprivileged with a greater degree of self-reliance, while allowing them to feel a stronger sense of belonging as members of the community. Saeum builds 3-4 houses each semester and 1-2 houses during school breaks. Saeum embodies Yonsei’s spirit of sharing and service with each house-building project it undertakes.

**Yon-In Project**

The “Yon-In Project” (Help Close at Hand) is a large-scale academic guidance and mentoring program that will be introduced next year at the Yonsei International Campus. Yonsei students from the Songdo campus will mentor students at elementary, middle, and high schools in the region. This mentoring program will provide one-on-one and small group tutoring, as well as guidance sessions after school. Yonsei will be actively recruiting student volunteers for this program.

**Medical Volunteer Work Abroad**

To honor the legacy of Dr. Avison, founder of Yonsei’s medical school, Yonsei University Health System’s (YUHS) first medical mission went to Mongolia in 1993. Since then, YUHS has undertaken medical mission trips to Kenya, Cambodia, the Philippines, and Ethiopia, with some 150 medical staff members treating over 5,500 patients. In November 2012, the YUHS team cooperated with Korean broadcasting station MBC and KOICA (Korea International Cooperation Agency) to treat 2,200 patients in Senegal. Severance Hospital’s “Global Severance, Global Charity” program also offers free treatment to patients from underdeveloped countries who are otherwise unable to gain access to essential medical treatments.

**Yonsei Murray Camp**

The Yonsei Murray Camp was created to expand quality educational opportunities for middle school students in Gangwon Province. During the 2-week camp, participants stay on the Wonju Campus, receiving hands-on guidance from professors with their school work. Extracurricular activities are also offered, allowing students to further develop their hobbies and talents. In the future, the Murray Camp will take place during both school vacations and the regular semester, and Yonsei student volunteers will visit schools in the area to share their knowledge and experience with middle school students.

Yonsei takes pride in fulfilling its social responsibilities by sharing its knowledge-base and resources with the community at large. Believing that community involvement is an essential component of the educational experience, Yonsei has a variety of volunteer and community service leadership programs.

Some of these include: the Sinchon Campus’s “Dream Start,” Wonju’s “Murray Camp,” Yonsei University Health System’s overseas medical missions, and Songdo’s “Yon-In Project.” In these service programs, experiential learning is emphasized as an invaluable method for developing greater social awareness and civic responsibility.

Giving Back to the Community
Setting New Standards for Higher Education

Academic Units  
As of Apr 2012

Sinchon Campus
- College of Liberal Arts
- College of Business & Economics
- School of Business
- College of Science
- College of Engineering
- College of Life Sciences & Biotechnology
- College of Theology
- College of Social Sciences
- College of Law
- College of Music
- College of Human Ecology
- College of Sciences in Education
- University College
- Underwood International College
- College of Medicine
- College of Dentistry
- College of Nursing

International Campus
- Open Major, University College
- Underwood International College (I.U.D. freshman, ASS, TAD)
- College of Medicine (freshman)
- College of Dentistry (freshman)
- College of Pharmacy
- School of Integrated Technology
- College of Engineering
- Global Program - Pre-Major Program

Wonju Campus
- College of Humanities & Arts
- College of Science & Technology
- College of Government & Business
- College of Health Sciences
- EastAsia International College
- Wonju College of Medicine

Yonsei Research Centers
- Active Polymer Center for Pattern Integration
- Biometrics & Engineering Research Center
- Center for Atoms, Wires & Layers
- Center for Bioactive Molecular Hybrids
- Center for Chronic Metabolic Disease Research
- Center for Information Storage Devices
- Center for Nanocrystalline Materials
- Center for Space Astrophysics
- Center for Supramolecular Nano-Arrangement
- Center for Sustainable Buildings
- Center for Technology Fusion in Construction
- Center for the Innovation of Engineering Education
- Genome Institute
- Institute of East and West Studies
- Institute of Humanities
- Institute of Korean Studies
- Institute of Legal Research
- Institute of Life Science and Biotechnology
- Institute of Medical Engineering
- Institute of State Governance Studies
- Nanomedical National Core Research Center
- Pioneer Research Center for Neuro-Science & Technology
- Protein Network Research Center
- Research Center for Orofacial Hard Tissue Regeneration
- The Asian Institute for Bioethics and Medical Law
- Yonsei Proteome Research Center

Intercollegiate Research Institutes
- Center for Cognitive Science
- Center for Signal Processing Research
- Communication Policy Research Center
- Electronic Business Research Center
- Human Identification Research Center

Exchange rate 1 USD = 1,090 Korean won
(As of September 31, 2012)
Yonsei celebrates its 128th anniversary this year. As Korea’s first university, Yonsei has firmly established itself as a diverse and vital place of learning founded on the Christian principles of truth and freedom. In educating global leaders who will contribute to Korea and all humankind, Yonsei remains faithful to the vision of H. N. Allen, H. G. Underwood, and O. R. Avison whose passionate devotion to this land gave birth to the university.

While the name of the university comes from Yonhee College and Severance Hospital, Yonsei (延世) also means “leading the world.” Since its establishment, Yonsei has endured the pain and suffering of Korea’s modern history, while becoming a world-class center for Korean Studies and medical science, and a pioneer in medical volunteer work. Through it all, Yonsei has demonstrated extraordinary resilience, growth, and innovation, solidifying its status as the top private university in Korea.

Jejoongwon, Severance Medical School, and Yonhee College stand as the origin and foundation of higher education in Korea. The “First Founding” designates the establishment of Jejoongwon in 1885, while the “Second Founding” occurred in 1957 with the merging of Yonhee College and Severance Medical School into Yonsei University. In 1981, nearly a century after its founding, Yonsei opened the Wonju Campus.

Now, the establishment of the Yonsei International Campus in Songdo, Incheon, marks a “Third Founding” signaling Yonsei’s bright future as a global university. Yonsei will continue to lead the way in internationalizing Korean higher education, welcoming elite faculty and students from around the world to its international campus.

The Residential College (RC) program is due to begin in March 2013. The integrated RC educational environment, combining dynamic learning with a vibrant community life, will accelerate the process of internationalization at Yonsei. Its innovative and well-rounded curriculum will produce competitive global leaders who understand the importance of community, communication, and empathy.

Kap-young Jeong, Ph.D.
President of Yonsei University

Yonsei International Campus : Realizing Yonsei’s Global Vision

Yonsei International Campus : Realizing Yonsei’s Global Vision

Transformation of Yonsei Main Road (Baekyang-ro) into Green Space

When Yonsei celebrates its 130th anniversary in the spring of 2015, the highly symbolic Yonsei Main Road (Baekyang-ro) will be re-born, marking the start of a new chapter in Yonsei’s history. The Baekyang-ro Revitalization Project will replace the current two-lane road with an eco-friendly, pedestrian-centered space above ground, while providing expanded parking and commercial space underground.

Stretching from Yonsei’s Main Gate to the statue of Dr. Horace Underwood at the center of campus, Baekyang-ro received its name when agriculture students planted white poplar trees (Baekyang-namu in Korean) as part of their practical training. It was first a trail, then a winding lane, and finally the straight road that it is today.

Continuing Development of Songdo

Songdo, Incheon continues to enhance its profile as an international, high-tech, and eco-friendly “smart city,” and in 2012 it was selected to host the Green Climate Fund, a United Nations-affiliated program. A vital contributor to the growth and enrichment of Songdo, the Yonsei International Campus is preparing to begin its next phase of development. Currently, the YIC consists of 8 colleges, including Underwood International College and the School of Integrated Technology, with 660 undergraduate students. Beginning in 2013, the Residential College (RC) educational program will be offered to freshmen.
