Yonsei University Wonju Campus
YONSEI, where we make history
About Yonsei

Wonju Campus Overview

Continuing the Yonsei Legacy: Making Dreams Come True in Wonju

When the Wonju Campus was established, it inherited the 127 year history and spirit of Yonsei University. Now, the Campus invites talented young students to carry on the future of Yonsei through joint activities with the Seoul Campus in the areas of education, research, administration and finance. With an independent master plan of its own for further development, the Wonju Campus contributes to the community and the country including Gangwon Province’s winning bid for the 2018 PyeongChang Winter Olympic Games.
Yonsei Mission, Spirit and Founding Philosophy

Yonsei University is a center for learning based on the principles of Christian teaching, one which strives to educate leaders who will contribute to society in the spirit of truth and freedom.

Yonsei people embrace the culture of the nation and of humanity and foster creative and critical thinking in the pursuit of scholarship. Yonsei people also nurture the sense and spirit of justice, work with an open mind in service to their neighbors, and contribute to the growth of humanity.

"If you continue in my word, you are truly my disciples, and you will know the truth, and the truth will make you free." (John 8: 31-32) With its founding principle based on the Gospel of John, Yonsei University seeks to cultivate leaders who follow the Christian principles of truth and freedom.

Yonseians are educated based on strong morals, ethics and humanism, and they are trained to be able to criticize and evaluate themselves throughout their lives. They are taught to be leaders with mutual understanding and respect, the spirit of cooperation, and the Christian principles of love, service and sacrifice.

There are 249,565 Yonsei alumni who are working in every part of society with a central role of developing the nation and the world. They contribute to maintaining fellowship among alumni, to heightening Yonsei’s reputation, and to improving the campus educational environment.

We, the Yonsei community, taking this mission to heart, commit ourselves to becoming leaders who carry to the world this proud Yonsei spirit.
University Symbol

The "⭕" and "ائح" in the University shield are derived from the first letters of "연세" [Yonsei]. The circle "⭕" represents the ideal of a complete and well-rounded person, while the " возможно" symbolizes the upward struggle for scholarly excellence. In addition, the "⭕" stands for Heaven, the "ائح" represents the horizon of the Earth, and " เมื่อaccurate" signifies "Man" as expressed in the Chinese character "人". The open book stands for Truth, the torchlight signifies Freedom, and the shield protects these two core principles of the University.
LEE Insung, Ph. D
Chancellor of the Wonju Campus
Yonsei University
Greetings from Chancellor

Welcome to the Wonju Campus of Yonsei University.

Founded in 1978, the Wonju Campus is one of the four campuses in the Yonsei University system and, most probably, one of the most fast growing universities in the nation. It is a diverse learning community, with more than 7,000 students from all over Korea and a student body that reflects the face of our society. International students from East Asian countries, North America, and Europe make up a growing portion of the student body.

The Wonju Campus is well known for the strength of its undergraduate education, where its students learn to lead and serve not only through a strong academic curriculum but also by participation in a host of extracurricular activities, from athletics to community service, in its Residential College.

The Wonju Campus is also a major research university in certain fields of study that include Biomedical Engineering, Chemistry & Medical Chemistry, Modern Korean Literature, and Poverty Alleviation Studies. Led by a distinguished faculty, it carries on the world-class research on the graduate level. In the diversity of its students, its global outlook, and its outstanding education and research, the Wonju Campus is a university of compelling change.

We welcome your interest in the Wonju Campus of Yonsei University and in our community. Please Explore the Campus Web site to discover more about opportunities at the Campus. I hope you will have an opportunity to visit our beautiful campus in person to discover what makes the Wonju Campus special and why Wonju is consistently ranked among the most favored and livable cities in Korea.
Korea’s First Residential College

Promoting harmonized development of academic achievement, artistic sensitivity, and morality in a natural wooded setting - a new model for Korean college education!

Yonsei University Wonju Campus is the first Residential College in Korea
With its Residential College program, Yonsei University Wonju Campus has initiated an advanced education program for freshmen, following the model of prestigious overseas universities. Since 2007, Yonsei University Wonju Campus has implemented a remarkable mentoring education program. All freshmen live together in the same dormitory with the full support and guidance of experienced professors and staff. From 2012, all sophomores will also participate in the program as they enter courses in their majors.

The Residential College
The Residential College is an advanced educational model adapted from British and American universities such as Oxford, Cambridge, Harvard, Yale and Princeton. This advanced model enhances relationships between professors and students by bringing them together in dormitories on campus. This program provides students the opportunity to participate in intellectual and social activities, thereby helping them to adapt smoothly to the culture of the university.

Residential Colloquia Offer Exciting Intellectual Stimulus
Our Residential Program focuses on opening the students’ full human potential. This program allows professors and students to select freely a subject based on their interests and cooperate with each other in conducting projects that may be outside their majors. This Residential Colloquia program is offered to small groups of 15-20 students. The program encourages students to solve problems more effectively and efficiently. In today’s knowledge and information based society, knowledge changes rapidly and students must learn to adapt to such changes.
International Program

Housing
The dormitories, Maeji Haksa, Seiyon Haksa, and Cheongyon Haksa, have the equipment and facilities required in this age of information technology and globalization. They can accommodate up to 3,730 students in doubles, triples or quads. Housing is available to undergraduate students, graduate students and exchange students, with separate buildings for men and women. Usually, a mix of Korean and non-Korean students live together in order to provide an international atmosphere. Each room is equipped with LAN connections for free Internet use. Off-campus housing is available within walking distance. The dormitories are also open during the summer and winter vacations.

Korean Language Courses for Exchange Students
Korean language courses are designed to help students who are learning Korean for the first time or are expanding their Korean proficiency. The courses focus on conversation along with easy-to-follow explanations of Korean grammar.

Leisure Activities
Wonju, Gangwondo, is just an hour and half trip from Seoul. Located in the vicinity of Chik Mountain and numerous beaches of the East Sea coast, Wonju is one of the most famous tourist attractions in Korea. Wonju is also known as a place for leisure sports such as skiing, rafting, mountain biking, scuba diving, and many other activities. Students can enjoy their free time while experiencing Korean culture in these natural surroundings.

Academic Information

Exchange Students
The Wonju Campus of Yonsei University welcomes international students from all over the world. International students can study at the Wonju Campus either by regular admission or by participation in an exchange program.

Exchange students are those who have applied and are nominated by an overseas university under a formal exchange agreement. Since they pay the tuition to their home universities or the universities pay it, the application and documentation fees are waived at the host university. The home universities usually accept academic credits.

Admission to one or two semesters of the exchange program is open to students who have completed at least two semesters (or the equivalent) of university level work at an accredited institution outside of Korea. Admission is based on a review of the documents submitted, which include a recommendation letter, a personal statement, and required GPA.
Global Village Program

The Global Village Program (GV Program) is an extension of the student exchange program, in which English-speaking students can study and live with small groups of Korean students. The GV program began with English but it was extended to also include Chinese and Japanese in 2010. All activities in the GV Program are conducted in either English, Japanese, or Chinese. Foreign students can better understand the Korean lifestyle and culture as well as make friends with Korean students. Korean students can also experience other cultures while using a foreign language to study and interact with the exchange students.

For foreign students participating in the Global Village Program we offer financial aid, which covers travel and living expenses.

For further information regarding the Global Village Program, please visit http://global.yonsei.ac.kr

Korean Language Courses for International Students

Yonsei University Wonju Campus offers Korean language courses. These courses are designed for international students who plan to study at universities in Korea.

The goal of the courses is to equip students with a sufficient command of the Korean language to pursue undergraduate or graduate programs in Korea.

The Korean language courses are offered at six different levels. Each level consists of a ten-week long term. It takes two years to complete all 6 levels. Classes are offered four hours a day, five days a week, during the ten-week term.

A high school diploma or the equivalent is the minimum requirement for admission to the program.

For further information regarding application, please visit http://yiec.yonsei.ac.kr
Academics

**Wonju Campus**
- College of Humanities & Arts
- College of Science & Technology
- College of Government & Business
- College of Health Sciences
- EastAsia International College
- Wonju College of Medicine

**Sinchon Campus**
- College of Liberal Arts
- College of Business & Economics
- College of Business
- College of Science
- College of Engineering
- College of Life Science & Biotechnology
- College of Technology
- College of Social Science
- College of Law
- College of Music
- College of Human Ecology
- Science in Education
- University College
- Underwood International College
- College of Medicine
- College of Dentistry
- College of Nursing

**Songdo International campus**
- Premium Education Program
  - Open Major
  - Underwood International College
  - College of Medicine & Dentistry
  - College of Pharmacy
  - School of Integrated Technology, College of Engineering
    - Integrated Information Technology
  - Global Program - Pre-Major Program

**Admissions Guide**
Applicants whose parents both have foreign nationality are considered foreign students. The admissions process includes a review of documentation followed by an interview. For details and application forms, please visit [http://admission.yonsei.ac.kr](http://admission.yonsei.ac.kr)

**Scholarships**
There are approximately 114 scholarships offered to undergraduate students and about 12.2 billion won is given to 8,650 students annually. There are many scholarships available for freshmen. Those students who receive scholarships, either for academic achievement or for special talents, can keep those scholarships through graduation if they maintain a certain GPA level and participate in selected activities.
College of Humanities and Arts

Division of Liberal Arts
Korean Language and Literature
English Language and Literature
History and Culture
Philosophy

Division of Design and Arts
Industrial Design
Visual Communication Design
Digital Arts

Division of Liberal Arts
The Division of Liberal Arts has four departments: Korean Language and Literature, English Language and Literature, History and Culture, and Philosophy. The Division of Liberal Arts focuses on research and education in the humanities, which include such skills as achieving high proficiency in language and developing logical thinking. The division offers the required courses which allow students to study the humanities in depth. Students focus on the creation, progress, and transition of human literature, as the aim of the division is to develop qualified human resources for the new era.

Division of Design and Arts
The Division of Design and Arts has three majors: Industrial Design, Visual Communication Design, and Digital Arts. The Division of Design and Arts focuses on research and education in the specific field of product design, graphic design, space design, media design, interface-interaction design and digital arts, offering specialized course work. The division provides first year students with required courses of design and arts fundamentals and introductory lectures on general design, including liberal arts and sciences from undergraduate’s general courses. It offers the Bachelor of Science for students who complete industrial design, and the Bachelor of Design for students who finish visual communication design and the Bachelor of Fine Arts for digital arts.
The College of Government and Business has two divisions: the Division of Social Sciences (Economics, Public Administration, and International Relations), and the Division of Business Administration.

The College also offers two interdisciplinary majors: International Commerce and Venture Entrepreneurship, and an interdisciplinary Honors Program in Finance. The faculty of the College has grown considerably over the last two decades. To ensure high academic standards, the College has recruited highly qualified scholars from world-class academic institutions. The expertise of the current faculty members enables the college to keep abreast with state-of-the-art scholarship in education and research.

- Division of Social Sciences
  Economics
  Public Administration
  International Relations

- Division of Business Administration
  Business Administration
College of Science and Technology

The College of Science and Technology was established to promote education and research in the areas of natural and applied science and technology. Our nationally renowned 53 faculty members have been actively involved in various educational and research projects at the local and national levels.

The college is composed of four divisions which include the Division of Natural Sciences, the Division of Biological science and Technology, the Division of Applied Sciences, and the Division of Computer and Telecommunications Engineering.
The College of Health Sciences has established itself as a leading pioneer in the public health field. It contributes to the advancement of society by training leaders in the specialized fields of Environmental Engineering, Biomedical Engineering, Health Administration, Biomedical Laboratory Science, Occupational Therapy, Physical Therapy, and Radiology.

Lectures and laboratory practice provide an excellent foundation for the specialized education needed to produce leaders who will play a central role in the public health field. The College of Health Sciences offers the Bachelor of Science degree, Master of Science degree, and Doctor of Philosophy degree in all departments.
The EastAsia International College (EIC), founded by Yonsei University Wonju Campus in 2008, is a special program aimed at nurturing and developing budding professionals who will play leading roles in the global age of the 21st century.

The EIC has two major tracks: EA Politics and Culture, and EA Economy and Business. Students foster their international perspectives through general courses in liberal arts for the first and second years, and through courses in their major fields of study, exchange programs, and business internships during the third and fourth years.

All courses are conducted exclusively in English, and students are required to study one East Asian language as a second foreign language, thereby enabling them to become competent global citizens.
With the spirit of the Christian faith and a belief in pluralistic education, the Wonju College of Medicine teaches and trains students in medical theory and application to prepare for medical service.

The goal of the College is to train qualified medical professionals with a strong character in line with the Christian faith, who will work in primary medicine and advance community medicine, using superior research and leadership skills.

- Department of Medicine
- Department of Nursing
- Department of Dental Hygiene
Graduate School

Founded in the spirit of Christianity, the Graduate School aims to contribute to the advancement of world civilization by providing in-depth specialized education and research opportunities. Our graduate school has set up a credit transfer system with other major Korean universities, which means that our students can expand the opportunities to take a great variety of courses. As of 2010, approximately 414 graduate students had enrolled in its programs. For details and application forms, please visit http://www.yonsei.ac.kr/grad

Professional Graduate School
 Graduate School of Government and Business

The GSGB was established as a training ground for government and public officials and managers in private businesses. The primary emphasis of the School is on offering systematic and effective training in management skills and techniques to improve administration in key areas. The School offers a five-semester Master’s degree program and a two-semester professional program in eight major areas: Economics and Commerce, Business Administration, Management Information Systems, Public Administration, Law, Politics, Educational Administration, and Computers and Information. Since opening in 1990, the School has launched a short-term Executive Management Program in order to help administrators play a major role in the international community by providing them with up-to-date management skills and techniques.

Graduate School of Health and Environment

The GSHE was established to produce qualified specialists and to further research in the field of public health and the environment. The program is designed for highly motivated professionals with related work experience in five fields: Health Administration, Environmental Engineering, Biomedical Laboratory Science, Ergotherapy, and Medical Engineering. Students are trained to interact with people of various economic and social levels, to protect the environment, to produce health policy legislation, to identify and evaluate the economic impact of changing demographics, and to deal with difficult issues in the public health arena.

Today’s society faces serious health problems including new and devastating infectious diseases, problems related to an aging population, spiraling health-care costs, and environmental pollution resulting from rapid industrialization and urbanization. The mission of the School is to meet these challenges by promoting achievement in academics and helping students develop practical skills in a work environment, which allows them to combine their work experiences with state-of-the-art techniques and new knowledge.
Campus Facilities

Dormitories
The Yonsei housing complex (Maeji Haksa, Seiyon Haksa, and CheongYon Haksa) consists of eight buildings housing approximately 3,700 students. Dorms are equipped with computer labs, lounge areas, study areas, a lecture room, a prayer room, music rooms, and laundry facilities. All incoming freshmen will be accommodated in the dormitories. All dormitories are equipped with air-conditioning, and high-speed Internet connections.

Sports Center
The Yonsei Sports Center occupies a facility which was built in 2003. At the Sports Center, students can participate in a variety of activities to keep in shape. The Center has basketball, volleyball, handball, and squash courts, a gymnasium, a fitness club, a rock climbing facility, and an indoor swimming pool with an aqua health pool as well as a scuba diving pool.

Library
The library has a collection of 436,492 books and 65,082 electronic periodicals. The library building, with five stories above and one underground, can accommodate 1,316 students. Interlibrary loan services are provided for the students. They can have easy access to the Central Library on the Seoul Campus, as well as to materials housed in various university libraries around the nation. The integrated library system of both campuses allows access to various digital media sources.

Yonsei Plaza
Yonsei Plaza is equipped with various amenities including a large, well-stocked bookstore, a bank, a post office, a copy station, a laundry, a convenience store, a travel agency, a book rental shop, an optometrist, a cafe, a student cafeteria, a faculty/staff cafeteria, and a snack area. The Plaza also has PC labs, language labs, and many other places students can go to get their work done.

Research Institutes

Yonsei’s Wonju Campus pursues strong partnerships with government, industry, and other universities in the research of key technological areas such as medical engineering, rehabilitation engineering, high-tech medical equipment, eco-technology, and entrepreneurship. Since its inception, the Wonju Campus has worked hand in hand with companies and with government institutes in research and development, fostering and producing high-quality professionals in these areas.
Institute of Medical Engineering Yonsei University
The Institute of Medical Engineering Yonsei University was established in April 1995. It was designated as a strategic institute within Yonsei in July 2003. The institute operates six research centers such as Research Institute for Medical Instrumentation and Rehabilitation Engineering, Technology Innovation Center for Medical Instruments, Institute of Advanced Biomedical Engineering, Medical Instrumentation Education Center, Medical Device Development & Promotion Center, and Yonsei Fraunhofer IZFP Medical Device Lab, all financially supported by the national government. In addition, the institute takes charge of assisting Wonju Medical Industry Techno Valley by providing overall assistance in research, medical engineering experts, high tech devices, and facilities.

Institute for Poverty Alleviation and International Development (IPAID)
The Institute for Poverty Alleviation and International Development (IPAID) was established as a university-wide research institution in March 2010. The National Research Foundation (NRF) of Korea chose IPAID as one of its Core University Research Centers in 2010. IPAID seeks to work with international institutes and experts to identify the causes of poverty and create solutions, and to share the Korean development experience with other countries. Programs at the IPAID office at Yonsei University-Wonju include weekly forums with established academics and experts, international conferences, and a graduate program on rural society leadership development for global poverty reduction.

Wonju Eco Techno Center
The Wonju Eco Techno Center was completed in 2006 with a budget of 6 million dollars. This project is receiving joint investments from the Yonsei Environmental Science Technology Research Institute and the city of Wonju. This facility is designed to help researchers develop techniques to convert industries into environmentally friendly and information-oriented industries in accordance with stricter environmental laws. It is also expected to help make the city of Wonju a center of education and research for eco-technology.

Yonsei Wonju Business Incubator
The Yonsei Wonju Business Incubator Center (YWBIC), designated by the Department of Small and Medium Enterprises, was completed in January 2000. The Center helps to assist and fund selective small businesses whose futures are promising. During the short history of the Center, it has successfully run projects such as the Small Business Road Show, and continually offers courses for small start-up companies.

Intercollegiate Research Institutes
Institute for the Study of Korean Modernity
Institute of Functional Biomaterials and Biotechnology
Yonsei Institute of Hospital Administration

College Affiliated Research Institutes
The Institute of Basic Sciences
Echo Culture Convergence Design
Institute of Health Sciences
Yonsei Institute of Environmental Science and Technology
Institute of Occupational Medicine
Institute of Basic Medical Sciences
Institute of Hair and Cosmetic Medicine
Eco Campus

Nestled at the foothills of Chiak National Park, Yonsei University Wonju Campus boasts a campus of stunning natural beauty and is arguably one of the most scenic campuses in Korea. The campus is located 85 miles southeast of Seoul in Gangwon Province. The campus occupies 470 acres of land at the base of the White Cloud Mountains overlooking a lake. Among Korean universities, Yonsei University Wonju Campus received the first ISO 14001 Environment Management certification.

Christian Life

Yonsei strives to nurture its students based on strong morals and ethics as well as a responsibility to both the nation and the world. Students are taught the importance of developing a sense of duty as leaders to help resolve regional and social problems through the Christian principles of love, service, and sacrifice. The college is dedicated to grooming leaders who possess mutual understanding, respect, and the spirit of cooperation. The students are required to attend a weekly one-hour chapel session for four semesters as one of the graduation requirements. All students are also expected to meet a community service requirement during their first year.

Concert Series

The Yonsei University Concert Series began in the fall of 2006. There had been 42 series by the spring of 2011, and the concerts will continue with a sixth season in the fall of 2011. Each year, the series features a diverse range of music, including both western and Korean classical music, and jazz. The concerts entertain not only students, faculty and staff, but also members of the Wonju community at large, and have become one of the major cultural attractions in the city.

Parents Day

The first Parents Day in Korea was introduced at the Yonsei Wonju Campus in 2007. The event seeks to provide parents with important information and the vision needed to assist undergraduate students in making a successful transition to college. The fifth event, on May 20, 2011, invited over 500 parents to share the progress being made by both students and the university.
Student Activities
At Yonsei, students have abundant opportunities to explore non-academic as well as academic activities outside the classroom. With more than 70 student groups and organizations representing the areas of academics, music, religion, arts & crafts, community service, and various sports, students are sure to find something that matches their interests. The school actively supports student extracurricular activities.

Yonsei-Korea Friendship Sports Festival
Every year Yonsei University and Korea University co-host a series of sports matches called the "Yongojeon" which are intended to promote university spirit and build fraternity between the two schools. The festival consists of baseball, basketball, ice hockey, rugby and soccer competitions.
